PANDEMICS: WHAT EVERYONE NEEDS TO KNOW (PAPERBACK)

Oxford University Press Inc, United States, 2013. Paperback. Book Condition: New. 206 x 137 mm. Language: English . Brand New Book. From HIV to H1N1, pandemics pose one of the greatest threats to global health in the twenty-first century. Defined as epidemics of infectious disease across large geographic areas, pandemics can disseminate globally with incredible speed as humans and goods move faster than ever before. While vaccines, drugs, quarantine, and education can reduce the severity of many outbreaks, factors such as global warming, population density, and antibiotic resistance have complicated our ability to fight disease. Respiratory infections like influenza and SARS spread quickly as a consequence of modern, mass air travel, while unsafe health practices promote the spread of viruses like HIV/AIDS and hepatitis C. In *Pandemics: What Everyone Needs to Know*, Nobel Prize-winning immunologist Peter C. Doherty addresses the history of pandemics and explores the ones that persist today. He considers what promotes global spread, the types of pathogens most present today and the level of threat they pose, and how to combat outbreaks and mitigate their effects. Concise and informative, *Pandemics* will serve as the best compact consideration of this topic, written by a major authority in the field.
