Whereas atmospheric modeling was once the domain of a few research units at universities or government laboratories, it can now be performed almost anywhere thanks to the affordability of computing power. Atmospheric general circulation models (GCMs) are being used by a rapidly growing scientific community in a wide range of applications. With widespread interest in anthropogenic climate change, GCMs have a role also in informing policy discussions. Many of the scientists using GCMs have backgrounds in fields other than atmospheric sciences and may be unaware of how GCMs are constructed. Recognizing this explosion in the application of GCMs, we organized...

### Reviews

*I actually started looking over this publication. It really is really interesting through studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- Dana Hintz

*Good electronic book and valuable one. It really is basic but unexpected situations in the 50 percent in the pdf. You won't really feel monotony at any moment of your time (that's what catalogues are for concerning when you ask me).*
